01 COLLECTION
NATURAL STONE

KITCHENS FROM THE HEART OF THE EARTH

TERRA® offers a selection of the finest natural stones, sourced from the world's most remote locations. This exclusive collection features rare quartzites and stunning granites, each with its own unique beauty.

TERRA® combines beauty with sustainability, creating spaces where the kitchen becomes the heart of the home. Here, life unfolds daily, and the countertop becomes a timeless surface - one that tells a story of elegance, nature, and memories.

100% NATURAL AND RECYCLABLE

REAL SUSTAINABILITY

TERRA® countertops are one of the most sustainable kitchen choices due to their exceptional durability and recyclability. Natural stone can last over 100 years, and if a change is desired, it can be reused or fully recycled at the end of its life cycle - making a significant contribution to sustainability.

TOUCH THE STONE, FEEL NATURE

The sensory properties of natural stone make it truly unique.

Visually, its range of colors, textures, and patterns is unmatched—no two stones are ever alike. Only nature can create **TERRA**®.

The finishes of natural stone are incomparable; no artificial process can replicate its beauty and texture.

Stone is naturally cool to the touch, providing a soothing sensation, while its sound-absorbing properties enhance a serene, tranquil atmosphere.

POLISHED FINISH

EXPERIENCE THE WARMTH AND UNIQUE
TEXTURES OF NATURAL STONE

NATURE'S DESIGN

Each **TERRA**® slab is a one-of-a-kind masterpiece, shaped by nature itself. Its size, pattern, and colors are unique and unrepeatable. Variations and irregularities should be embraced, much like other natural elements—such as wood or plants—where no two are ever the same.

SHOPPING EXPERIENCE

PICK AND CHOOSE YOUR COUNTERTOP. NO TWO ARE ALIKE

Nature's unpredictability makes each piece one of a kind. You have the freedom to choose your perfect, uniquely patterned slab for your project.

Resistant to heat, cold,
and thermal shock

CLEANING AND MAINTENANCE

DAILY CLEANING

Keeping your natural stone countertop clean is simple. Wipe it down with a damp cloth using water and mild soap. Avoid abrasive or harsh chemical cleaners to preserve its beauty.

STAIN REMOVAL

If a stain occurs, act quickly to prevent it from setting into the stone. For food stains such as oil or wine, use a damp cloth with water and mild soap. If the stain persists, a special natural stone cleaner may be needed.

PERIODIC MAINTENANCE

To maintain the beauty and durability of your natural stone countertop, apply a protective treatment once a year. This will help resist stains and shield the surface from external elements, ensuring long-lasting protection.
